

## Java Programming Lab 09

You will be using JavaFX for this lab. Reading the *JavaFX 8 Introduction by Example* book chapter 1 starting at page 23 "Using the Command-Line Prompt". Do not install Netbeans on the lab PCs. You may on your own computer, but you will be on your own for debugging or questions.

Write a java program using JavaFX 8 to open a window that has two buttons. See the image below. The top button will write to the console "Make Java Great Again!". The bottom button will toggle from ON to OFF as it is clicked.

This window opens at 300, 300.

The Java button is at 60, 60.

The ON/OFF button is at 60, 120.
